

BHARATH DASARI

Sr Data Science Consultant
Experimentation & Optimization

CONTACT

- Hyderabad, India
- aba21bharath@iima.ac.in
- +91 9959899430
- linkedin.com/in/barathdasari
- github.com/barathdasari

EDUCATION

- PG Diploma in Advanced Business Analytics
IIM Ahmedabad | 2021 - 2022
- B.Tech in ECE
G. Pulla Reddy Engg. College
2012 - 2016

CORE SKILLS

EXPERIMENTATION

- A/B Testing
- Bayesian
- Power Analysis
- Sequential
- Causal Inference

GENAI & LLMs

- Claude API
- Prompt Eng.
- AI Agents
- RAG
- Streaming

PROGRAMMING

- Python
- SQL
- R
- Streamlit
- Git

ML & STATISTICS

- Regression
- Clustering
- NLP
- Neural Nets
- Classification

DATA PLATFORMS

- Adobe Analytics
- Looker
- BigQuery
- Teradata
- HANA

VISUALIZATION

- Tableau
- Power BI
- Plotly
- Seaborn
- Chart.js

CERTIFICATES

- Google
Data Analytics Professional
- HackerRank
Python Programming
- Pluralsight
Feature Engineering

Profile

Analytics professional with a PG Diploma in Advanced Business Analytics from IIM Ahmedabad and 9+ years of experience across Telecom, Retail, Banking, Insurance, and Healthcare. Expertise in A/B testing, experimentation, Bayesian analysis, and statistical modeling. Skilled in building GenAI-powered data tools using LLMs (Claude API), Python, SQL, and modern web frameworks. Proven track record in experimentation platforms, AI-assisted data discovery, and real-time dashboards. Adept at cross-functional collaboration and mentoring teams.

Experience

Sr Data Science Consultant

Oct 2024 – Present

Verizon

Hyderabad

- Led design and execution of 70+ A/B tests** for VCG Assisted Channels, optimizing conversion rates and engagement, achieving **15% uplift** in conversions and **\$2M+ incremental revenue**.
- Built an AI-powered Data Discovery Agent** using Claude API (tool_use), Flask, and React — natural language search across 1,000+ analytics events and 14 database tables, reducing lookup time by 80%.
- Developed GenAI-assisted Data Preparation tool** (Streamlit + Claude) automating sample size calculations, power analysis, group assignment, and 20+ transformations for A/B test readiness.
- Created real-time dashboards** using Adobe Analytics, Looker, SQL, and Python, with automated reports improving decision-making efficiency by 30%.
- Enhanced A/B testing methodologies** with Bayesian models and sequential testing, improving accuracy and reducing test duration by 25%.
- Implemented PEGA vs. PzAI recommendation models** on B360 Gridwall, conducting multivariate tests with Adobe Analytics Workspace tracking.

Senior Data Engineering Analyst

2021 – 2024

Accenture | L'Oréal

Hyderabad

- Led 10+ technical workshops** translating business requirements into data-driven insights, improving team efficiency by 30% in A/B testing frameworks.
- Resolved critical data engineering bottlenecks**, reducing processing time by 40% and ensuring seamless experimentation pipeline execution.
- Developed ETL pipelines** migrating 500+ GB to HANA, improving speed by 50% with 99.9% accuracy.
- Optimized SQL queries** reducing execution time by 60%, enabling faster statistical analysis.
- Built 100+ transformation workflows** using Informatica Power Center, enhancing efficiency by 35%.

Data Analyst

2017 – 2021

Tata Consultancy Services | USAA | Bank of America

Hyderabad

- Conducted business requirements analysis** with stakeholders, defining KPIs and data models for reporting initiatives.
- Developed Informatica PowerCenter workflows** across Source Analyzer, Mapping & Transformation Designer for high-performance data loads.
- Performance Tuning** at Mapping, Session, Source, and Target levels for SCD Type 1 & 2, improving batch throughput by 40%.

Key Projects

- Data Discovery Agent** — AI-powered NL search for enterprise data (Adobe Analytics + Teradata/GCP). Flask + React + Claude API. Indexes 1,000+ events, 483 columns across 14 tables.
- Data Design Agent** — AI-assisted data prep for A/B testing with automated sample size calc, power analysis, Bayesian inference, and 20+ transformations. Streamlit + Claude API.
- AI Travel Planner** — Full-stack app with streaming itinerary generation (SSE). Node.js/Express + React/MUI + Claude API.
